Protocol Host Port

for every Host and Protocol, Port changes then local storage change window.

```
Add - LocalStorage.setItem (key: value);
```

```
Remove - localStorage.removeItem("key");
```

```
clear = localStorage.clear()
```

→ Const User0 = { name : "vishu" }

- `localStorage.setItem("user", "user");` // this not work

store
ab) \Rightarrow `const user = { name: "vijay" }`
`localStorage.setItem("user", JSON.stringify(user));`

```
opt : { "name" : "vivy" } // string
```

coherend => for normal opt : JSON.parse(localStorage.getItem("user"))
opt : { name : "vivek" } // original output as input

→ function setLocalStorageData ("user") {Json....}
