fundal of web programming

**\* storage \***

=) Local Storage is an api.

**3** Port  2 Host (Domain)  **1** Protocol

HTTP :// google.con :// 880

| Protocol | Host | Port |

- fore ewby Host alo Protocol, Port changesthen
local Storage change
window.

**Add** - localStorage . set Item ( key : value ) ;
("Hello", "world") :

**Remove** - localStorage. removeItem ( "key") ;
( "Hello w") ;

**clearo** > localStorage.clearo()

-> Const usero = { name : " vijay" }
- localStorage. setItem ( "user". "usero"); // to store obj
this not work

**store obj =)**
const usero = { name : "vijay" }
localStorage.set Item ( "user", JSON. stringify (usero));
opt : " { "name": "vijay" } " // string

comhsand => foro noronul opt : JSON. Parse ( localStorage. getItem ( "user"));
opt : { name : "vijay" } // original output  as input

**& function**
-> function setLocalStorage Data ( "usero") { Json...}

diff Cookies, Local Storage, Session Storage

| | Cookies | Local Storage | Session Storage |
|---|---|---|---|
| size | 4kb | 10mb | 5mb |
| Browser | Html 4/5 | HTML 5 | HTML 5 |
| Access | anywindow | - | - |
| Expire | manuy set | Nevero | on next tab |
| Storage location | browser and somero | browser | browser |
| Sent with req | yes | no | no |
